PROLOGUE

Country wide a serious thinking is going on for the last several years on professionalism in teacher preparation. There are debates, serious discussions and arguments on various issues related to teacher preparation and duration of course. After 1986 there is no policy on teacher education. Verma committee created a dent with its recommendations for professionalization of teacher education with two years rigorous training of pre-service teachers based on the philosophy of National curriculum framework 2005 and 2009 to prepare a professional and humane teacher.

NCTE two year B.Ed programme has brought a paradigm shift from conventional teacher centric to learner centric curriculum. This programme intends to create teachers as reflective practitioners.

Present curriculum designers scaffold the rigour of the framework which has made a comprehensive coverage of theory and field engagement with the child, school and community. Main focus is on three broad areas: Perspectives in education, Curriculum and pedagogic studies and Engagement with the field. It has brought a unique amalgamation of holistic perspectives by creating space for inter-disciplinary approach with themes cutting across the curriculum.

Special impetus is given to enhance professional capacities of student teachers (EPC's) to create professionalism in the preparation. The mode of transaction consisted of varied dimensions to learn through case studies, group presentations, project discussions, reflective documentations, workshops, tutorials and so on. Keeping in view a reflective eye to restore the innovative ideas and also considering the local needs by involving experts from Telangana state universities, Palamuru University took lead and conducted two workshops - one with state-wide experts and the other with Colleges of Education affiliated to Palamuru University and designed the curriculum. Department level core committee made rigorous exercise, deliberated, discussed on curriculum right from the structure to that of framing curriculum.

The unique features of this curriculum are:

- Themes cutting across the curriculum
- Reflective practices
- Inclusion
- Gender
- CCE
- Creditisation
- Semesterization
- e-Portfolio assessment
- interdisciplinary approach

This curriculum created a space for introspecting oneself, emerging into reflective, autonomous, acceptable, empathetic, creative humane teacher with integrity to become a responsible citizen and lead the nation towards a progressive developed nation.

Credits, Grade Letter, Grade Points, Credit Points

Credit is a unit of academic input measured in terms of the weekly contact hours assigned to a course.

Grade Letter is an index to indicate the performance of a student in a particular Course (Paper). It is the transformation of actual marks secured by a student in a Course/Paper. It is indicated by a Grade Letter O, A+, A, B+, B, C, F. There is a range of marks for each Grade Letter.

Grade Point is weightage allotted to each grade letter depending on the marks awarded in a course/paper.

Credit Points number of credits assigned for the paper multiplied by grade point secured for that course / paper

Award of Grades

Range of % of Marks	Theory		Practicum	
	Grade Letter	Grade Point	Grade Letter	Grade Point
85 to 100	O	10	O	10
70 to 84	A+	9	A+	9
60 to 69	A	8	A	8
55 to 59	B+	7	B+	7
50 to 54	B	6	B	6
40 to 49	C	5	-	-
Less than 40	F	-	-	-

Semester Grade Point Average (SGPA)

Credit Points for the paper = No. of Credits assigned for the paper x Grade Point secured for that course/Paper.

SGPA indicates the performance of a student in a given Semester. SGPA is based on the total **credit points** earned by the student in all the courses and the total number of credits assigned to the courses/papers in a Semester.

Note: SGPA is computed only if the candidate passes in all the papers (gets a minimum 'C' grade in all the Papers)

$$\text{SGPA} = \frac{\text{Total Credit Points in the Semester-1}}{\text{Total Credits in the Semester-1}}$$

Cumulative Grade Point Average (CGPA)

CGPA refers to the Cumulative Grade Point Average weighted across all the semesters (4 Semesters). CGPA is obtained by dividing the total number of credit points (CPts) in all the semesters by the total number of credits in all the Semesters. The final result at the end of all the semesters is declared in the form of CGPA.

Note: CGPA is calculated only when the candidate passes in all the papers of all the semesters.

Ex: Faculty of Education

CGPA =

$$[\text{SGPA of I Semester} \times \text{Total Credits of I Sem}] + [\text{SGPA of II Semester} \times \text{Total Credits of II Sem}] + [\text{SGPA of III Semester} \times \text{Total Credits of III Sem}] + [\text{SGPA of IV Semester} \times \text{Total Credits of IV Sem}]$$

Total Credits of I Semester + Total credits of II Semester + Total credits of III Semester + Total credits of IV Semester

Note: The result of the successful candidates shall be classified as follows:

- | | | |
|------|----------------------------------|-------------------------|
| i. | First Division with Distinction: | CGPA from 9.00 to 10.00 |
| ii. | First Division: | CGPA from 8.00 to 8.99 |

II. Electronic Portfolio Assessment – 25 marks

All the students should compile the works done during internship program all through 120 days. What is that I liked the most, to say it is the excellent work I could perform and also some things to share with everybody? These things for instance a student must have prepared a good teaching aid, drama, observation, assembly activity, a rally, pictures or

work done displayed in the school. Students should capture all the images electronically and create a digital e-portfolio to visualize the real field realities to understand the interwoven aesthetics hidden in the works done. It shows the creativity & ingenuity of the students and ingenuity of the student's and their presence. All the excerpts they think good and their peer group feel it is well done such of the works can also be placed in the portfolio. Also student should show other works in a separate folder for the consumption of faculty to adjudicate the best from their point of view.

This kind of compilation leads to self reflection, self analysis, self –judgment and self image and self confidence. It gives space for more transparency and visibility to the self and also to the teacher, parent and community. Some of the best e-portfolios can be placed on the college websites to motivate other teachers and student-teachers. They also improve the skills of documentation, visualization of the work done to the self and others. Students develop skills and learn by sharing with others. This generates thinking self questioning and self motivation and a zeal to work. Colleges' can select the best portfolios to encourage the quality of students work.

Resources for creating effective teaching portfolios:

- a. PDF documents – Electronic version of the documents are prepared on the Adobe acrobat software which is easy to store and share them with others.
- b. Databases – Tracking students' work is possible with FileMaker Pro. With this database, teacher can catalogue work and produce profiles across group of students.
- c. Multimedia authoring software – HyperStudio is one of the early software while many teachers use advanced ones such as MS PowerPoint, Macromedia Director or eZedia's eZediaQTI.
- d. Videos – Generally the videos in digital form have great flexibility and provide interactive elements displaying the elements of the portfolio.
- e. Websites – Sharing the portfolios easily is possible when they are placed on the internet as they have audio and video presentations. These are available on the website – <http://electronicportfolios.com/portfolios/bookmarks.html#vendors>.
- f. Ready-made software packages – My ePortfolio is available Learning Quest while Learner profile can be accessed on Sunburst websites which are of database nature to build the portfolios with fields to attach files of written or video products.

Steps in creating e-Portfolio for Internship and whole course:

The manner in which electronic portfolios are created and used is given below:

- i. *Determining the portfolio requirements:* The essential aspects to consider here are - products, media for use and criteria. These are available on many of the rubrics for evaluating the quality of portfolio.
Student teachers can create a layout creatively & present by utilizing different resources provided below to create their own e-Portfolios for assessment. There is no fixed sequence; the student teacher has freedom to organize, theoretically, chronologically, event-wise, category-wise. This would enable each student to present their portfolios as per their criteria, interest & creativity.
- ii. *Creating the structure:* Different sections of the portfolio are presented on the medium by choosing the PowerPoint or other software.
Students can design the sequence of their e-portfolio as per their work and quality of their work and the aspects they would like to present from the beginning to the end. Any unique experiences students want to highlight, such as lesson

Plans, aids, reflections, children's' responses, teacher appreciation, classroom presentations, learning, and so on can form a part of their e-portfolios.

- iii. *Adding and linking components*: The media and products created need to be added to structure the portfolio.
Since e-portfolio is open & flexible to keep on adding & enhancing till they present for the final adjudication, it not only gives a grade / score but a kind of self-reflection and a great sense of achievement and accomplishment. When they look back it is great to see & share.
- iv. *Monitoring the products and receiving feedback periodically*: Products are reviewed by teachers to find out if criteria are met.
Student teachers can have an opportunity for self monitoring & feedback from friends, peer group, school, supervisors, and mentors at the college / teacher educators to enhance the presentation and assessment.
- v. *Reflecting on the products and make necessary revisions*: Components of the portfolio are modified based on the feedback.
Each and every item presented can be rated on a ten-point scale & rate where the student's work stands and at the end of the each item that he / she places in the e- portfolio, record your reflections on it.

Student teachers can share their e-portfolios in group & place them at their college's website for review.

This e-portfolio makes a student teacher to not only reflect on their work transparently, but also helps them to learn many skills of compilation, pooling resources, organization, presentation and also technological skills and various e-resources, software, Open Education Resources and so on.

The steps in the creation and the use of electronic teaching portfolios are schematically represented as shown below:

2. Agriculture, Industry, Transportation
3. Water Bodies and Forestry. Mitigation methods
4. Mission Kakatiya - Water Bodies and Haritha Haram - Plantation
5. Food, Consumption, Recreation, Housing and Indoor temperature and Green Buildings Engagement

	Environmental	Mode of Transaction & Engagement
--	---------------	----------------------------------

	Issues	
1	Haritha Haram: Tree-planting and Tree Survival Monitoring	Let the students plant a sapling under Haritha Haram Programme and monitor its growth every week for one year. Students are asked to adopt a tree in and around the school/Residence and maintain a tree diary to note their periodical observations on tree ecology: Birds, Flowers, Fruits, Insects and Seasonal Changes in Leaves. Explain the medicinal values and importance of trees in eco system.
2	Mission Kakatiya: Community-Based Water Body Monitoring:	Take the students to a water body which is being covered for restoration under Mission Kakatiya. Let students test the water quality and estimate the water quantity by taking the length, breadth, depth and calculate the water holding in the area.
3	Schools raising awareness about mosquito breeding sites	Identifying the stagnant water in the school which causes the development of larva which leads to mosquitoes Identify the sources(fresh water or used water) of stagnant water and work on it Schools raise awareness about mosquito breeding sites, eliminating standing water.
4	School gardening programmes supporting nutrition.	Motivate the students to grow different plants in school premises ask them to use only organic manure. Plant those trees which yield fruits and vegetables to feed the school Students
4	Project works to the students	Ask the students to make projects on biodiversity, pollution and deforestation and come out with options through group discussion, role plays and presentations Students in school adopted at least one environmentally-friendly behaviour at home and make a presentation on it.
5	Biodiversity handbook	Student is asked to observe the Biodiversity in the school/Parks/Nearby Water bodies and maintain a record which is to be updated once in a month. Maintain the biodiversity handbook(register) of their Town/City/State/Country
6	Carbon footprint	As carbon footprint is a measure of the impact our activities have on the environment, and in particular climate change. It relates to the amount of greenhouse gases produced in our day-to-day lives through burning fossil fuels for electricity, heating and transportation. Based on this students are asked to develop projects on this topic and implement it in the school campus and observe it in regular intervals and project developed by senior students to be explained to their juniors
7	Climate change handbook:	Create a folder on climate change and human health Students are asked to involve their family members by asking them what the weather was like at their age when they were of your age, and compare it Record the difference between climate and weather Ask the students to analyse the reasons for climate change and solutions to overcome it
8	Global warming:	Students are asked to develop the projects on Global Warming and implement the project in the school. To stress the issue update the information once in 3 months like as follows: Gradual increase, observed or projected, in global surface temperature. Consequences of the enhanced greenhouse effect, which is induced by anthropogenic emissions of greenhouse gases into the atmosphere. Greenhouse effect: A term describing the role the earth's atmosphere

		plays in insulating and warming the earth's surface. Without this effect the earth would be a frozen planet with an average temperature on the surface of about -18°C (about 0°F)
9	Field trips	Provide opportunities for Students to interact with their environment through field trips like visiting community parks, nearby water bodies, Sanctuaries, National Parks, and Organic Fields. After-school they are allowed to develop projects on research and action projects, and to practically apply what they have learned.
10	Climate adoption	Have to be take up the project which are focused on climate science, mitigation and adaptation. Adaptation research focuses on understanding how the world will respond to a warmer future, moderating the damage, and exploring opportunities. Specific topics have included crops, pests, birds, corral, and human health. Ask the students to observe the behaviour of the animals , birds and their pets depending on the climate changes and maintain a record of it and which is to updated once in 3months (Season change)
11	Impacts of climate change on health	We need to ask the students to identify the impacts of climate change on human body and how it would affect the water bodies the Extreme weather events such as cyclones, floods and droughts which diminish the water resources, causing increased malnutrition, waterborne diseases such as diarrhea, and vector-borne diseases such as malaria.
12	Activities	Ask the students to make posters and slogans on Impact and effects of climate change on human body, solid waste surveys, and local food production.
14	Community Projects:	Students are asked to observe and listen to community debates, interviews of professionals and politicians in a newspaper and maintain a record of that. Observing laying of water carrying pipes for a new water system.
15	Surrounding Mapping	Mapping the surrounding pollution and the traffic jams Students can develop maps that identify dangerous and safe locations in their community, best routes for safe evacuation, and environmental hazards such as garbage, quicksand and wells. Maps can also show locations of play areas and highlight different types of play.
16	Item rating and card sorting.	Boys and girls can make clear judgments about the quality of their environment by rating the features that are important to them, individually or as a group. Many techniques can be used, from card sorting, using markers or stickers to other conventional rating methodologies
17	Drawings	Asking Students to draw pictures of things is tricky and should be used carefully. Adults usually do not interpret Students' drawings accurately without help. Students themselves should explain their drawings and annotate them.
